PATENT APPLICATION

Docket No. 2600.2.16

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicants: Horst Noglik et al.)
Serial No.: 10/647,905)
Filed: August 25, 2003)
For: POLYMER SYSTEM WITH SWITCHABLE)
PHYSICAL PROPERTIES AND ITS USE IN)
DIRECT EXPOSURE PRINTING PLATES)

TRANSMITTAL OF INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Transmitted herewith is an Information Disclosure Statement disclosing information which has come to the attention of applicants and/or their attorneys and is being submitted so as to comply with the duty of disclosure set forth in 37 C.F.R. § 1.56. In accordance with 37 C.F.R. § 1.97(b), the enclosed Statement is being filed within three (3) months of the filing date of the above-identified application or before the mailing date of a first Action on the merits.

Neither applicants nor their attorneys make any representation that any information disclosed herein may be "prior art" within the meaning of that term under 35 U.S.C. § 102 or § 103. Moreover, pursuant to 37 C.F.R. § 1.97, the filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made or as an admission that the

information cited herein is, or is considered to be, material to patentability as defined in 37 C.F.R. § 1.56(b).

In accordance with 37 C.F.R. § 1.98, transmitted herewith are:

1. A completed copy of Form PTO/SB/08A "Information Disclosure Statement by Applicant" listing the patents, publications and other information being submitted for consideration; and
2. A legible copy of each patent, publication and other item of information in written form listed on the enclosed Form PTO/SB/08A, except for copies of U.S. patents and published U.S. patent applications which are not required for applications filed after June 30, 2003.

As this application was filed after June 30, 2003, copies of the U.S. patents and published U.S. patent applications listed on the enclosed Form PTO/SB/08A are not required and, therefore, not included herewith.

NON-ENGLISH INFORMATION

Pursuant to 37 C.F.R. § 1.98, following is a concise explanation of the relevance (as it is presently understood by the individual designated in 37 C.F.R. § 1.56(c) most knowledgeable about the content of the information), of each listed patent, publication or other information that is not in the English language:

1. Japanese Patent Application No. 11070756 published March 16, 1999 discloses:
PROBLEM TO BE SOLVED: To eliminate scumming by a method wherein a hydrophilic binder polymer is three-dimensionally crosslinked by utilizing interaction between a polyvalent metal ion and a Lewis base part contg. nitrogen, oxygen or sulfur existing in the hydrophilic binder polymer and a thin film layer of a hydrophilic polymer is provided on the surface of a hydrophilic layer.

SOLUTION: A heat-sensitive lithographic printing raw plate has a hydrophilic layer contg. a microcapsule lipophilic ingredient which is transformed to an image

part by heat and a hydrophilic binder polymer and a substrate. In addition, the hydrophilic binder polymer is three-dimensionally crosslinked by interaction between a polyvalent metal ion and a Lewis base part contg. nitrogen, oxygen or sulfur existing in the hydrophilic binder polymer. In addition, a thin film of a hydrophilic polymer is provided on the surface of the hydrophilic layer. Therefore, substances for cause of stain coming from the outside are suppressed. It is possible thereby to obtain a lithographic printing plate with high printability and high dimensional accuracy and to obtain a lithographic printing raw plate which provides a printed matter with no scumming and with clear image.

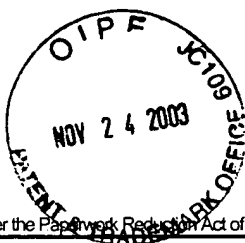

Respectfully submitted,

A handwritten signature in black ink, appearing to read "E. R. Witt", written over a horizontal line.

Evan R. Witt
